Office Action Summary

Art Unit: 1714

The objected claims 14 and 16 are withdrawn due to new ground of rejection.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) 1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a); or

Claims 1, 3-6, 14-18 and 20 are rejected under 35 U.S.C. 102(e) as anticipated by Yanus et al (US 6,107,439).

Yanus et al teach the instant oxalic acid crosslinked, alcohol-soluble polyamide (Luckamide 5003) adhesive containing a charge transporting molecule and product thereof in example I. Other alcohol-soluble polyamides are taught at col. 11, lines 1-38 wherein CM4000 and CM8000 are also seen. Various charge transporting molecules are taught at col. 11, line 39 to col. 13, line 10.

Thus, the instant invention lacks novelty.

Art Unit: 1714

Claims 9, 10, 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 21 is allowed.
